Deals On Wheels

Sell your car, bike, RV or Trailer... \$39 until sold, up to 3 months!

Dear Motor Medics,

I have a car that needs a timing belt, and it is going to cost over \$1700.00 to change. That sounds crazy to me. I have had belts changed before on my cars and they have never been more than \$50.00 but none of my cars have had timing belts. It is a 2005 Lexus so I know it might run a little more than some of the other domestic cars I have had but come on, 1k is just way over the top and I think I may be getting taken. Can I just let it go?

Ben in Portland Maine

Dear Ben,

Welcome cars with timing belts. When we give purchase advice, we will tell buyers to take the cost of regular timing belt service into account when they purchase a car. It is a Must-do item that if let go will eventually break and in the case of an interference engine "which most are" will destroy the engine or severely damage it at the very least and that can cost thousands to repair. The timing belt takes the place of the timing chain and it times the movement of the valves and pistons so that the valves are closed when the pistons get to the top. If the valves are open, then they will collide, and parts will break. Timing belts are typically in the range of \$800.00 to over \$2000.00 to do the job on some cars.

Take care, the Motor Medics

Dear Motor Medics,

I was filling up my washer bottle in the dark so that I could keep my windows clean and wanted to use the kind that cleans bugs off and de-ices, you know the kind that's orange. Well, it is also the color of engine antifreeze so if you haven't got it yet I poured engine antifreeze into my windshield washer bottle. Antifreeze really makes a mess on the window and I cannot see a thing. How do I get it out? The bottle is buried deep in the fender.

Mark in Bennington Vermont

Dear Mark,

You are not the first or the last one to do this. We take this question several times a year and it can be fixed. You need to get all the coolant out of the bottle and clean the glass well to get rid of the streaks the coolant leaves. If you have not run the pump then get a suction gun from a parts store and remove all the coolant you can then flush with water, suck out the water with the suction gun and repeat until free of antifreeze then add new washer fluid. If you have run the pump, you will need to do the previous steps then run the pump to clear the lines of antifreeze. You can also have your local mechanic do this for you. Mixing fluids is never good but mixed-up washer fluid is easier to fix than other fluids.

Take care, the Motor Medics

CONSUMERS TRUST NEWSPAPERS

Here's further proof that advertisers and marketers seeking a trusted media should hire newspapers. Products in a newspaper's portfolio show up in the Top 5 "trusted advertising channels" rated by U.S. consumers. So says Nielsen's 2021 Trust in Advertising Study. Seven out of 10 consumers said they either trust completely or trust somewhat four of the channels that include newspapers or products they offer advertisers. The top channel applies also to newspapers because their readers are informed consumers.

Special note: The Relevance Project thanks The Nielsen Co., a global leader in audience, measurement, data, ad analytics, for this excerpt from its Trust in Advertising Study. Nielsen used 21 channels, a term to distinguish where ads show up or are referenced, in the study.
